Dear DHS,

The reports from the 2012 - 2013 SPA and the 2014 SPA in Senegal both include a stand alone maternity statistics register in the appendix with the assessment instruments. I am writing to ask if the data from these registers are publicly available and, if so, how they can be requested. I have looked through the Senegal SPA data files (prefixes SNSP6 and SNSP7 respectively), but I'm unable to locate variables that might correspond to the maternal registry. Would it be possible to provide guidance on finding these variables if the data were in fact collected and are available? Please let me know if I can provide any further details.

Thank you,

Hannah

Dear User,  
I did some checking and the maternal registry data is currently not available for distribution until further notice. We are investigating the possibility, but it's not available at this time. If anything changes we will let you know as soon as possible.  
Thank you!
