Hi there

I working on 2011 Ethiopian DHS to analysis the effect of contraceptive using and postpartum insusceptability on fertility, but i cant find the variable that postpartum insusceptability and the other problem is how to analysis the prevalence of contraceptive use among married women using SPSS. It would be great if you could let me know which variable to use and the Syntax to analyse the prevalence of contraceptive use among married women on 2011 EDHS data.

Many thanks for your help

Teke
