Hello,

is there a way to download altogheter all the datasets of the same kind (e.g. the files "Household Recode" and "Wealth Index" if available) for all the surveys (all countries all years at once)? I am doing it survey by survey but it is quite inefficient. So I was wondering if there's a trick for such a job. Many thanks. Marzia

We are planning to have that functionality added in the future. Unfortunately you will have to download the datasets by survey for now.
