I just learned that the Uganda 2011 and 2006 surveys as well as the Ghana 2008 survey asked males as well as females about their experience with physical and sexual violence. Have other countries incorporated these questions for men as well? Is there a list of them somewhere? My googling has yielded nothing. Thank you in advance!

Dear User,

Attached is a spreadsheet showing the completed surveys with domestic violence for both men and women. When you hover over the comment section, you will be able to see the questions asked for each. Hope this helps!

Thank you!

Sexual and physical violence experienced by men is an important but often under-discussed issue. Although societal stereotypes sometimes portray men as less vulnerable, research shows that men can and do experience various forms of violence, including sexual assault, domestic violence, and physical abuse.
