Hi, anyone knows if the variable "Months of Breastfeeding" is for exclusive breastfeeding only or complementary breastfeeding also?  
I don't understand why I have a negative correlation and negative regressions's beta between months of breastfeeding and the child's malnutrition (measured by height for age).  
Thank you very much,  
Simo

Dear User,  
Here is a response from Senior Data Processing Specialist, Mr. Guillermo Rojas,  
Quote:  
Months of breastfeeding is asked in general and doesn't differentiate whether its exclusive or not.  
  
If you have additional questions please feel free to post again.  
Thank you!

Hi  
  
I am a bit confused about this response, as there is no question in the questionnaires where women are asked about the duration of their breastfeeding. Is this a derived variable ? or if it does appear in the questionnaire - please could you inform me as to where women are asked for how long they breastfed for.  
  
Thanks in advance for your help  
  
Chloe
