Hi, anyone knows if the variable "Months of Breastfeeding" is for exclusive breastfeeding only or complementary breastfeeding also? I don't understand why I have a negative correlation and negative regressions's beta between months of breastfeeding and the child's malnutrition (measured by height for age). Thank you very much, Simo

Dear User,

Here is a response from Senior Data Processing Specialist, Mr. Guillermo Rojas, Quote:

Months of breastfeeding is asked in general and doesn't differentiate whether its exclusive or not.

If you have additional questions please feel free to post again. Thank you!

Hi

I am a bit confused about this response, as there is no question in the questionnaires where women are asked about the duration of their breastfeeding. Is this a derived variable? or if it does appear in the questionnaire - please could you inform me as to where women are asked for how long they breastfeed for.

Thanks in advance for your help

Chloe
