Subject: Extracting DHS cluster from Nigeria 2013 Posted by texerc on Fri, 13 May 2016 15:15:01 GMT

View Forum Message <> Reply to Message

I can extract cluster numbers from the 2008 Nigerian DHS without problems, but in the DHS (the GPS data) for 2013 all "DHSCLUST" are a "Nan".

I am using Matlab and shape read

```
test2008 = shaperead ('NGGE52FL') test2013= shaperead ('NGGE6AFL')
```

Anyone has an idea what is going on?

/erik
