Hello.  
Is the domestic violence module conducted for years 2014,2005 and 1995 based on panel data?  
And in which data set exactly should I look for the domestic violence variables?  
Thank you.

Please use our survey search to find surveys with specific characteristics (e.g. domestic violence).  
The domestic violence variables can be found in the individual recode (women) dataset.

Thanks. I have found the relevant surveys but I'm not sure if the sample of women chosen to be interviewed for the domestic violence module is a panel or not. I would appreciate help with this.  
Thanks.

Following is a response from Senior DHS Data Processing Specialist, Nouredine Abderrahim:

The DHS surveys are not panel type, including those that used the domestic violence module. There were a couple of panel surveys in DHS and the reports will mention it. The one I can remember was conducted in Morocco in 1995, but it does not include a domestic violence module.
