Hi,

For one of my papers, I am using data on 2004 Bangladesh DHS. I have one concern related to 2004 Bangladesh DHS, and I would really appreciate your clarifications and help.

For 2004 Bangladesh DHS, the information on Height and Weight-WHO Growth Standards come in a separate file. I am trying to merge this file with the Children Recode file. I tried the suggestions/instructions that come with the WHO growth standard file. However, I am not getting success. I would really appreciate if you could please post the stata commands to merge these two files, I will really appreciate your help.

Many thanks
Bibhu
