I am interested in downloading and evaluating educational and other data from the 2014 Kenya Demographic and Health Survey (see <https://dhsprogram.com/pubs/pdf/FR308/FR308.pdf> for the survey report). When I select variables and samples, however, the 2014 dataset does not appear on the IDHS site - see: <https://www.idhsdata.org/idhs-action/samples>. I do see data for five prior survey dates. Can someone let me know if 2014 data are in fact available from the IPUMS-DHS website?

Thank you

We will be releasing the integrated data for Kenya 2014 by April 2017 at the latest. Unfortunately, the latest Kenyan sample was released too close to our 2016 data release date for us to have time to complete the integration work in time for that release.

Our Spring 2017 data release will also add data from Rwanda 2014, Ghana 2014, and the model dataset (ZZ2015). We'll also be releasing many new variables and additional documentation. Thank you for your patience in the interim.

Sincerely,
Dr. Miriam King
