Hello,

I am working on a study of FP over time in Senegal, and eagerly awaiting the release of the 2015 SPA and DHS datasets. Please could you let me know when you are planning to release these datasets? I am due to present findings at a conference in November, and it would be useful to know when these will be available.

Many thanks,  
Francesca

Epidemiologist, London School of Hygiene & Tropical Medicine

DHS datasets are not available until the final report is released for a particular survey. It's difficult to anticipate when final reports and/or datasets will be available, as their release depends on several factors. The data are generally released approximately 9-12 months after the last day of fieldwork, and on or after the publication of the final country report.

We are expecting the final report for Senegal 2015 SPA to be published by the end of September 2016, and data availability will be sometime in October.

In the meantime, please sign up for "data availability email alerts", so you will be notified as soon as data are released <http://dhsprogram.com/email-subscribe.cfm>

Dear Bridgette,

I was wondering if you have any updates on when the 2015 SPA for Senegal dataset might be released? Would you recommend getting in touch with the country team directly?

Many thanks,  
Francesca

We are anticipating that the raw data will be available online by mid-February.

Thanks for your patience.
