Hello,

I am trying to download geographic data for the Democratic Republic of Congo and Central African Republic at the subnational level. Everytime I try to put in the indicators I want to download in a shapefile in the Spatial Data website (<http://spatialdata.dhsprogram.com/>), I get an error saying that it cannot create the package.

Does anyone know what the problem is?

Thanks,
Christy

Than you for reporting this error.
We are fixing it and hope that the site will be back to its normal functions shortly.
