Subject: merging wealth index file for Turkey DHS 1993

Hi,
I am trying to merge the wealth index file (identifier whhid) with the birth recode file, but cannot figure out what concatenation or trimming of caseid, v001, etc re-create whhid. I found user forum responses about Malawi and other data sets, but those do not apply to the Turkey file. Is there documentation for how whhid is constructed?
Thanks,
Seema

Dear User,
Please review the section on merging on our website:
http://dhsprogram.com/data/Merging-Datasets.cfm
After reviewing this resource, if you still have questions, please feel free to post again. Thank you!
