Hi,
Am trying to create the CWI using 2007 Zambia DHS.

```
. * CWI score = Alpha + Beta * v191
. gen cwi_2007 = -0.6714665 + 1.0443476*v191

. sum cwi_2007
```

Variable	Obs	Mean	Std. Dev.	Min	Max
-----+-----					
cwi_2007	7146	19388.11	112233.5	-121483.4	264237

The output seems incorrect and need assistance understanding where I have gone wrong

Many thanks

Dear User,
Quote:
Comparative Wealth Index (CWI) Coefficients

DHS Surveys
Country Year Constant (Alpha) Coefficient (Beta)
Zambia 2007 -0.6714665 1.0443476

Dear Ika and Liz, What would be the STATA syntax to calculate the CWI?
