Hi,

I have a question about the variable sh75a ("move to another house/place: what the family did?) in the Dominican Republic 2013 HH dataset.

I somehow fail to retrace this variable to a specific question in the survey, could someone please provide me some more information what the question was of this variable?

Many thanks in advance!

Kind regards,
Inez

SH75a is a country specific question from question 75 in the household questionnaire. For country specific questions, the variables are generally named and coded in the same way as they were on the questionnaire. The variable will have a leading "SH" if the question was asked at the household level, a leading "S" if asked at the women's level, and a leading "SM" if asked at the men's level.

This helps a lot, thank you for your fast reply!

Best,
Inez
