I am trying to access the Malawi 2015-16, household member recode file (SPSS). When I open the dataset in SPSS I receive an error which states the following, "The specified file is empty. Select another text file".

Any help would be much appreciated.

Thanks.

Something went wrong during zipping/uploading. The file has been replaced, so please login and download.

Sorry for the inconvenience.

Thanks for the alert!
