Hello.. how can I recode women empowerment (decision making )using stata? The variables are as follows v743a v743b v743c v743d.. how do I group the variables into one composite variable to create a dichotomous variable?

Following is a response from Senior DHS Stata Specialist, Tom Pullum:

This is an analytical question, and it would not be appropriate for DHS staff to make a recommendation. I hope you can check relevant literature or get suggestions from other forum users.
