Dear,

I am using the ir dataset and I need the information on the husband's education in single years. However, In the Maldives 2009 dataset the information is either zero or "don't know" for all the sample:

. ta v715

husbands education-si ngle yrs	Freq.	Percent	Cum.
0	714	10.01	10.01
don't know	6,391	89.62	99.64
99	26	0.36	100.00
-----+-----			
Total	7,131	100.00	

Is that a problem in the dataset?

Thank you,
Fernanda

The variable: V715 is now corrected, and a new version of the data has been released on our website. Please login to your account to download the corrected version.

Thanks
