---

I am using Nigeria DHS 2013 data set. I am having problem replicating the figures in table 11.7 for percentage given vitamin A supplements in the last 6 months among all children aged 6-59 months.

---

Dear User,  
The DHS Program has recently released a blog and a series of youtube videos on matching to the final report. You can find these here:  
<http://blog.dhsprogram.com/final-report-tables/> and here: [https://www.youtube.com/watch?list=PLagqLv-gqpTMU3avlnBDodTWCazURy4C T&v=tjuaPV4eC\\_E](https://www.youtube.com/watch?list=PLagqLv-gqpTMU3avlnBDodTWCazURy4C T&v=tjuaPV4eC_E)

After reviewing these, if you still have questions, please feel free to post again.  
Thank you!

Dear Liz,  
Thank you very much for your prompt response. However, i am still having difficulties replicating table 11.7 of the 2013 Nigerian DHS report(percentage given vitamin A supplements in the last 6 months).  
-What variable was used for vitamin A supplementation in the last 6 month?  
-I used H34 and recoded as follow: 1=1 (yes), 0=0 (No), 8=0 (dont know), 9=missing. I then selected children aged 6-59 months (after creating the variable childs age (v008-b3)). However, the weighted prevalence of vitamin A supplementation that i got for all children aged 6-59 months is quite different from what was reported in the 2013 Nigeria DHS report.

A response from Senior Analyst, Dr. Lindsay Mallick:

Quote:

Here is some code to help match the Vitamin A indicator to the final report. In order to match, you also have to use the date of the supplementation according to the vaccination card.

---

gen wt= v005/1000000

gen agetmonths = v008 - b3

\*to match vitamin A to the report, need to convert month/year from vaccination card into CMC

gen month = h33m if h33m<13 & h33m>0

gen year=h33y if h33y>2004 & h33y<2016

gen vacccmc = (year - 1900)\*12 + month

gen last6 = v008 - vacccmc

gen lastva = 1 if last6<7

gen vita=0 if b5==1

replace vita=1 if h34==1

replace vita=1 if lastva==1

tab vita if agetmonths>5 & agetmonths<60 [iw=wt]

Thanks,  
Lindsay
