Hi everyone,

I am having trouble accessing the survey datasets for the Mozambique: Standard DHS, 2011 in the 'Flat ASCII data (.dat)' format. I am trying to download the individual recode and men recode but am getting the error messages 'unable to expand'. I am able to download the SAS files without any problems so I think there might be something specifically wrong with the 'Flat ASCII data (.dat)' format. Any help would be greatly appreciated. With thanks,

~Katie

We have sent a reply to the email address you registered on the Forum. Please note that all problems with your DHS download account should be sent to: archive@dhsprogram.com

Thanks for using DHS data.
