Hello

I am looking for data on health status from the Ghana's 2014 DHS. I spent the whole night going through the questionnaires to find a question on the health status of participants for the week (or any period) prior to the administration of the questionnaires, whether the participant was prevented from work or normal activities because of a disease or injury.

Is there any self-reported health status in the Ghana's 2014 DHS? I do need your assistance. Thank you in advance. Waiting to hear from you asap.

Regards,

karhin
