I am having trouble reproducing the mortality rates from the DHS report. How were they calculated?

I found link "http://www.measuredhs.com/zip/mrspss.zip" and "http://www.measuredhs.com/zip/mrsas.zip" are not working. I got this message "The link or bookmark is no longer valid and may have been moved in the new website. Take a look at the new navigation or search the website using the search tool at the top right corner. If you still experience problems, please contact feedback@measuredhs.com." Will you please let me know where can i find these materials.

Dear Liladhar,
I am researching that for you. Will let you know as soon as I have the answer. Thank you for pointing it out!

Dear Liladhar,
Please check out the Guide to DHS Statistics on our website.
http://www.measuredhs.com/pubs/pdf/DHSG1/Guide_to_DHS_Statistics_29Oct2012_DHSG1.pdf

Dear User,

At this time we do not have STATA files to calculate Maternal Mortality for distribution. Please refer to The Guide to DHS Statistics <http://dhsprogram.com/publications/publication-dhsg1-dhs-questionnaires-and-manuals.cfm> for a better understanding of many of our statistics. The section on ADULT AND MATERNAL MORTALITY begins on page 153 of the guide and is under the ADULT AND MATERNAL MORTALITY bookmark. This guide will

Quote:provide an overview on key aspects of the organization and use of DHS data sets.

It will also

Quote:serve as a reference document for researchers on the definitions and calculation of complex statistics used in DHS reports

All our tables for our final reports use CStata. However, you can find useful STATA tutorials at http://www.cpc.unc.edu/research/tools/data_analysis/statatutorial
