Hello

I am working on 2015/16 Malawi Demographic and Health Survey and would like to obtain district estimates (ethinicity by district) but I can not find the district variable. In which data file can I find the district variable? Or is there another way of obtaining district level information from the Individual file?

Thank you.

Lana

Hi Lana,

The 'shdist' variable in the household recode has the district codes and names.

best,

--Tom
