## Hello.

I am working with the Rwanda DHS 2014-2015 data set, and I need to get the number of all children under age 2 (as in table 11.3, last column). However, I am getting a higher number (3348) compared to the number in the table (3222). I need assistance on this.

I have used the following syntax:
DATASET ACTIVATE DataSet1.
COMPUTE WGT=V005/1000000.
EXECUTE.

## WEIGHT BY WGT.

COMPUTE Age_months=V008 - B3.
EXECUTE.

## USE ALL.

COMPUTE filter_\$=(Age_months < 24).
VARIABLE LABELS filter_\$ 'Age_months < 24 (FILTER)'.
VALUE LABELS filter_\$ 0 'Not Selected' 1 'Selected'.
FORMATS filter_\$ (f1.0).
FILTER BY filter_\$.
EXECUTE.
FREQUENCIES VARIABLES=filter_\$ /ORDER=ANALYSIS.

Thank you.
