Hello,

Would you be able to share the code that has been used to construct CWI for Liberia or any other country?

I searched for it in this forum but it looks like the code has not been shared.

There are coefficients for 2007, 2009, 2011 Liberia DHS datasets but not for 2013 dataset, which I need.

Have the coefficients been calculated for Liberia 2013 DHS data? If not, can the code be shared so that I can use it to construct it on my own?

Thank you so much.

Dear User,

For Liberia DHS 2013 we have available the Excel and PDF files. The SPSS files not available yet.

Thank you!
