Dear,

We were trying to reproduce the results from table 11.2 in the Senegal (2016) survey. Apparently there is a problem in the table - "Parties de chair enlevées" and "Entaille, pas de chair enlevée" are apparently interchanged according to the results from the datasets and considering the 2015 report. We just wanted to confirm that the dataset is fine and the problem is only the table heading.

Best,

Fernanda Ewerling

Following is a response from Senior DHS Stata Specialist, Tom Pullum:

You are correct--the categories are reversed. We had already noticed, and we are preparing an erratum.
