Hello colleagues,

Please I need your help with this tab on stata (do file).

I try and I got the tabs (12.1; 12.5 and 12.8)

I think that the questions are 134 (hml22) and 135 (hml23) (DHS 2015-2016, Angola household questionnaire)

But I'm having a wrong number applying the filters.

example: if obtained net on campaign

gen wt=hv005/1000000 (for weight)

hml22==1 (Variable)

obs: I just try with PR data too.

Please help, how can I replicate this tab using the right data?????

Thankssssss
