I was working with the 2015 DHS data for Colombia. I wanted to check if the height and weight of the child had been measured in this round as the variables do not have any observations, and also the variable for "entries in height/weight table" has the value 0. So, I wanted to check if they were recorded but will be available at a later date? Thanks.

Dear User, Anthropometric data was not collected for the Colombia DHS 2015 survey. Thank you for your post.
