Hi,

I wonder if it is possible to measure unmet need for family planning among unmarried adolescents using the Indonesia 2007 DHS surveys data.

Thank you!

Best,
Mirna

I don't believe so as I don't believe all of the questions necessary for aclculating unmet need where asked in this survey. You would have to check the questionnaire for this survey against the set of questions needed which can be found in https://www.dhsprogram.com/topics/upload/Questions-and-Filters-for-Unmet-Need-Definition-Appendix-A.pdf. For more information on the calculation of unmet need see https://www.dhsprogram.com/topics/Unmet-Need.cfm
