Hello,

I'm using two dhs datasets, Mali 2012-13 (mlir6hfl.dta) and Uganda 2011(ugir60fl.dta). I'm interested to husband/partner's occupation (v704 and v705). I have two questions about these variables.

1) When I made a frequency distribution of v704 for both countries, I found no label for its categories. How can I find them for both countries?

2) When I tabulated v705, I found just one category (did not work). Does this mean that all the women enumerated in this two countries dhs had unemployed husbands/partners? Or, is there another variable that captures husband/partner's occupation grouped for these countries?

Cum.

100.00

Here are Mali tabulation for example,

. tab v704

husband/pa tner's occupation	Free	q. Perc	ent	Cum.
++				
		49.85		
		3.03		
3	3	0.03	52.91	
		13.56		
5	156	1.74	68.22	
6	162	1.81	70.03	
7	86	0.96	70.99	
8	112	1.25	72.25	
9	156	1.74	73.99	
10	202	2.26	76.25	5
11	284	3.18	79.43	3
		19.50		
	96	1.07		
+				
Total	8,943	100.00)	
. tab v705				
husband/partner's occupation				
(grouped) Freq. Percent				
	did not work		10,424	100.00
		+		

Total | 10,424 100.00

Thanks you
