Subject: Infant and Child Mortality data set
Posted by dlaminwel@gmail.com on Fri, 07 Sep 2018 13:44:51 GMT

I'm working on TDHS 2005, 2010 and 2015 SPSS birth file.
i want to create a variable infant mortality and child mortality, what do i need to do? Since I want
to be able to extract two dataset using select cases (case 1: infant and case 2: child mortality).
Kindly please assist.

Unfortunately, we do not have SPSS code for Infant and Child Mortality. Please reference the
Guide to DHS Statistics for a description of the calculation of mortality estimates in DHS surveys:
https://www.dhsprogram.com/pubs/pdf/DHSG1/Guide_to_DHS_Stati stics_DHS-7.pdf.
