Subject: Can't find v023_ stratificaiton used in sample design_Gambia KR6
Posted by phyumar on Tue, 25 Sep 2018 07:59:54 GMT

Dear Sir/Madam,

I am working on Gambia KR6 file and I could not find v023 variable.
Usually I use this code to be able to run the data.

gen wgt=v005/1000000
svyset [pweight=wgt],psu(v021)strata(v023)
svydescribe

Could you kindly suggest me which variable should I put in "strata" ?
Thank you in advance!

Best,
Phyumar
