
Subject: GPS coordinates and variable names in SPA data

Hello,

I have two basic questions about the SPA datasets, specifically those in Senegal.

First, there are several webpages that indicate the SPA datasets include GPS coordinates or are geo-referenced. For instance, under the survey characteristics for the 2017 SPA in Senegal (<https://dhsprogram.com/what-we-do/survey/survey-display-534.cfm>), there is a bullet point for "GPS/georeferenced." However, I can not find any coordinates after having downloaded the dataset. Are these coordinates actually available? If so, where?

Second, what file is the best link between the variable names in the SPA datasets and the questions on the SPA questionnaires? The user notes that come with the 2017 SPA in Senegal suggest that, because only raw files are available, one should consult the "facility and provider questionnaire" to identify the variables. However, it is not clear to me how the questions in the SPA questionnaires here (<https://dhsprogram.com/What-We-Do/Survey-Types/SPA-Questionnaires.cfm>) link to the variable names to the raw dataset. Is there another file that makes this connection?

Thanks so much for your help.

Hello,

It looks like the GPS data are "not yet available" for the Senegal SPA. Is there an estimated date of release for these?

Many thanks,
Francesca

Another question: how can I request access to the GPS datasets for the 2012-13 SPA? I cannot find this option under the relevant project page in my accounts.

Many thanks,
Francesca

All of the pre-2017 GPS data for the Senegal SPA is now available for download

Many thanks for your response! I have just submitted the request.

Is there an estimated release date for the 2017 SPA GPS? This would be useful to know to decide whether it's worth waiting for the 2017 data before submitting a paper.

Thanks again,
Francesca

I don't foresee them being released until, at best, the summer

Hello!

I would be grateful for any updates on the release of GPS data for the 2017 SPA in Senegal.
Many thanks in advance!
