Hi,

I'm a PhD student in Paris and I work about twin's health and her demography in Sub-Saharan Africa.

I use DHS database from several countries and I want to know you who create the DHS_U5M sas macro command (<https://dataverse.harvard.edu/dataset.xhtml?persistentId=hdl:1902.1/18296&version=1.0>)?

I need some help to use it. In fact, the macro command is running with sas v6 database while I work with sas 9.4 database. Can someone put this macro available with sas 9.4 database for me?

Thanks

Best regards,

Adama
