I am looking at Uganda 2011 and 2016 SPSS files for the Household Recode, Household Member Recode, and Women's recode. In the Codebook Manual, the disability related variables are named HDIS1, HDIS2 etc. However, I cannot find any of these variables in the downloaded files.

Could someone please help me out?

Thank you, Liz.

I'm actually looking for the following data (taken from codebook for DHS 7):

QH26	= HDIS1 (RECHDIS)	: Wear glasses or contact lenses
QH27	= in HDIS2 (RECHDIS)	: Have difficulty seeing even when wearing glasses or contact lenses
QH28	= in HDIS2 (RECHDIS)	: Have difficulty seeing (don't wear glasses)
QH29	= HDIS3 (RECHDIS)	: Wear a hearing aid
QH30	= in HDIS4 (RECHDIS)	: Have difficulty hearing even when using a hearing aid
QH31	= in HDIS4 (RECHDIS)	: Have difficulty hearing (don't wear hearing aid)
QH32	= HDIS5 (RECHDIS)	: Have difficulty communicating using usual language
QH33	= HDIS6 (RECHDIS)	: Have difficulty remembering or concentrating
QH34	= HDIS7 (RECHDIS)	: Have difficulty walking or climbing steps
QH35	= HDIS8 (RECHDIS)	: Have difficulty washing all over or dressing

Is it not available for Uganda? Is it available for any other country?

For country specific questions, the variables are generally named and coded in the same way as they were on the questionnaire. The variable will have a leading "SH" if the question was asked at the household level, a leading "S" if asked at the women's level, and a leading "SM" if asked at the men's level.

The questionnaires can be found in the appendix of the final report.
