Subject: Initial breastfeeding codes using SAS Egypt DHS 2014
Posted by Nfadl on Thu, 07 Feb 2019 21:28:00 GMT

I am using Egypt DHS 2014 to analyze the initial breastfeeding practice (child file). Table 12.1 showed that percentage of mothers who started breastfeeding within 1 hour (27.1%). However, my results are not matching with the one in the report (mine is 29.6%). BTW, the table is based on last-born children born in the last 2 years preceding the survey.I would be grateful if you could help me to figure out the problem.
I used the following SAS codes:

```
options source2;
%include  '/folders/myfolders/EDHS2014/EDHS2014/FLAT/EGKR61FL/EGKR61FL .SAS';
LIBNAME a '/folders/myfolders/EDHS2014/EDHS2014/FLAT/EGKR61FL';

data work.demo1;
set a.EGKR61FL;
run;

data demo5;
set work.demo1;

sweight = v005/1000000;

child_age=(V008-B3);                          * CHILD'S AGE IN MONTHS;
IF child_age < 24 then do;                    * ONLY CHILDREN AGED LESS THAN TWO
YEARS OLD;
if V426 in (101:215) then lastchildintialBF=0;         *No (late);
else if V426 in (0,100) then lastchildintialBF=1;      *Yes;
else lastchildintialBF=.;
end;

run;

proc surveyfreq data = demo5;
cluster v021 ;*PSU;
strata v023;
weight sweight;
TABLES lastchildintialBF ;
RUN;
```

Hello Nfadl,

Try using the following SAS program. When I ran it, it matched the results in the report.
You only need to set the library (LIBNAME) to "EGYPTDHS" where the KR file is located on your computer and the rest should run.
Good luck.

*** **********

```
LIBNAME EGYPTDHS "\\HO12345678\Users\User1\Documents\EGYPT DHS
2014\EDHS2014_SAS";

DATA EGYPTDHS.EDHS_FEEDING;
 SET EGYPTDHS.EGKR61FL;

 weight = (V005 / 1000000);
 psu    = V021;
 strata = V023;

/** CHILD'S AGE IN MONTHS **/
 child_age=(V008-B3);

 IF child_age < 24;

/* REMOVING SCIENTIFIC NOTATION FROM RESULTS OUTPUT */
