Hi there! I noticed that the datasets for Peru 2010, 2011 and 2012 were removed from the website. I guess there were problems with them - is that right? We downloaded these files in Sept last year and are doing some work with them, so we need to know if they are usable. When will the datasets be made available again? Thanks!

The data have to be modified, to drop some variables that were not supposed to be there. They will be uploaded as soon as possible.

I'm assuming they are now considered reliable for all outcomes in the data? Were there major changes in any outcomes or the sample? Or just dropped some variables?

We provided limited technical assistance for the Peru 2010-2012 round of the continuous survey. Any questions about these data should be directed to the Instituto Nacional de Estadística e Informática (INEI) Lima, Perú (The Peruvian National Statistical office).

Thanks
