This recommendation relates to the addition of an indicator to capture timing of stillbirths (ante-partum and in-partum stillbirths) to facilitate the reporting of the in-partum stillbirth rate for all countries.

This submission is from the Sydney School of Public Health, The University of Sydney, Australia, prepared by Aliko Christou and A/Prof. Camille Raynes-Greenow. This recommendation is also endorsed by Dr Hannah Blencowe from the London School of Hygiene and Tropical Medicine, London, UK.

The completed submission with details and justification is attached to this post.
