Hello,

For India DHS 2015-2016, there is question 418 in the Woman's Questionnaire which is: As part of your antenatal care during this pregnancy, were any of the following done at least once? a. Were you weighed? b. Was your blood pressure measured, c. Did you give a urine sample, d. was a sample of your blood taken for testing, e. was your abdomen examined

However, in the Individual Recode data, I'm only seeing the variable "s418e" for - was your abdomen is examined but no variables for were you weighed, was your blood pressure measured, etc.

Do other people see the same thing in the Individual Recode and was this other data for the question lost? Or is it somewhere else?

Thanks for your help!

Figured it out! For anyone who was similarly confused, all of the other options for that question are included in the core questionnaire and are in the M42 variables.
