The 2007 Zambia DHS collected data on maternal mortality. The upcoming 2013 Zambia DHS will also be collecting data on maternal mortality. For future reference, you can choose the country and topic of interest from the Survey Search tool of the MEASURE DHS website to find out when different types of data have been collected in different countries.

Dear User,

Here is a response from one of our data processing experts, Ms. Mianmian Yu:

Maternal mortality is not tabulated on provincial level. If MM2 (Survival status of sibling) is 1, it counts a live birth.

Thank you for your post.

Please, can someone share with me the do-file used for the computation of aggregate indicators for maternal mortality?

I am working on the 2008 and 2013 Nigeria dataset.

Dear Javeria,

You have posted under a thread about maternal mortality, but it doesn't appear that your message has anything to do with maternal mortality. Please post under a new thread or an appropriate thread in future.

For information about complex samples commands for Stata and SPSS, see the following:

For Stata: <http://userforum.dhsprogram.com/index.php?t=msg&goto=2784>

and: <http://userforum.dhsprogram.com/index.php?t=msg&goto=2798>

For SPSS: <http://userforum.dhsprogram.com/index.php?t=msg&goto=2767>
