Hi:

I am working with datasets from Latin America. I have two doubts about variables v714 and v719. For women who answered that works for a family members or others (v719), should I consider this work "formal" or "informal"?

V714

If a women answered "no" for v714, indicates that she does not have a job or she is in maternal leave?

Another question is: is there any question in DHS that indicate if a women maternal leave?

Thanks a lot!
Ana Elisa
