Subject: Merging HW and BR in Zambia 2001-02

I'm trying to merge HW and BR in the Zambia 2001-02 (Wave IV) survey. It worked perfectly for Wave II and III, but not for Wave IV for some reason. It seems that 'hwline' in the HW dataset should be between 1 and 5, but is instead between 2 and 26. Hence I am unable to match the entries in the HW dataset to those in the BR dataset. Does anyone know how this might be done?

The code I used for merging waves II and III is as follows:

```
foreach i in 21 31 {
cd "$ZMHW"
use "ZMHW`i'FL", replace
 ren hwcaseid caseid
 ren hwline bidx
 sort caseid bidx
cd "$cleandata"
save "ZMHW`i'FL_clean", replace
cd "$ZMBR"
merge 1:1 caseid bidx using "ZMBR`i'FL"
drop if hc70==.|hc70==9998
}
```

Many thanks,

Hugh
