Hello,

I need assistance with Table 10.4 of the South Africa Demographic and Health Survey (2016). I am trying to replicate the table, but I have not been able to figure out the figures (though close) for Polio (Polio1) and DPT-HepB-Hib (DPT_HepB_Hib2 and DPT_HepB_Hib3).

Following is the Stata code I used:

```
clear all
set matsize 800
set maxvar 10000
set mem 1g
cd "C:\Users\...\Desktop\SADHS 2016 DATA\DATASETS\ZAKR71DT"
use "ZAKR71FL", clear
set more off
```

```
** SURVEY SET
gen psu = v021
gen strata = v023
svyset psu [pw = weight], strata(strata) vce(linearized)
