Hello,
The labels corresponding to the variables h32a..until h32z in Turkey 2013 DHS do not correspond to the response categories in the questionnaire. It seems to be instead the response categories of Tajikistan with the category "healthy lifestyle center", " family medicine center"..
Could you confirm that the labels are correct?
Thank you very much,
Nelly

You are correct that the labels are incorrect and appear to be copied from another survey. The questions for these variables were not asked in the Turkey DHS 2013, and so these variables contain no data information.
