Hello,

I have got a question regarding partner's occupation, v704. Where do I find what the country-specific codes stand for?

For example, for Nigeria's 2008 survey - where do I find what "61" stands for? I could not find it in the final reports and am wondering where to find the codebook.

Thanks a lot for your help!

Please open the codebook, which is the file with a .map extension. This file can be opened with any text editor, and contains the information you are looking for.
