I am working with DHS data set , and i am going to use SAS 9.2 for my data set analysis. For this moment it's little bit complicate to begin . I have just done proc import of my dataset , and my question is how to select the variable that I need in my analysis and I find also proc content and I logged in sas but on this proc content , there are many data set , and i need only work with adult. So how to begin in sas from data set and proc content

Dear User,

The DHS website has a whole section on "Using Datasets for Analysis".

<http://www.measuredhs.com/data/Using-Datasets-for-Analysis.cfm>. If you are working with the Individual Recode File, for example India NFHS 2005-06, the file you would want to unzip is iair52sd.zip. In addition to the data, the unzipped file also contains other resources such as weighted and unweighted frequencies, a map of the data, documentation providing details about the data such as country specific variables and other useful information. You may also want to refer the the Standard Recode Manual

[http://www.measuredhs.com/pubs/pdf/DHSG4/Recode6\\_DHS\\_22March2013\\_DHSG4.pdf](http://www.measuredhs.com/pubs/pdf/DHSG4/Recode6_DHS_22March2013_DHSG4.pdf) and The Guide to DHS Statistics

[http://www.measuredhs.com/pubs/pdf/DHSG1/Guide\\_to\\_DHS\\_Statistics\\_29Oct2012\\_DHSG1.pdf](http://www.measuredhs.com/pubs/pdf/DHSG1/Guide_to_DHS_Statistics_29Oct2012_DHSG1.pdf).
