Dear expert, I am a second-year MPH student at Addis Ababa University, Ethiopia. at this time I am doing my thesis on perinatal mortality using EDHS data but I failed to calculate the stillbirth for the 2000 EDHS data, anyone who help me on this
Thank you in advance
Abebech

Please provide details on how you failed to calculate the stillbirth - you may provide your code and your output. You could also reference the DHS code share library on github at <https://github.com/DHSProgram>.
