Why are there not individuals coded as "not working" in the Congo DR 2007 male dataset? It appears these respondents have been coded as missing.

Dear User, can you provide what it is you are looking at. Are you looking at a table, frequencies, or something else?

Dear User, the weighted frequencies show the following for V714
Respondent currently working.

Dear User, yes, this appears to be a mistake, we will look to get this corrected, but this may take a while to post a corrected version. Thank you for pointing this out.
