Dear experts,

I am trying to calculate the mean/median number of months of postpartum amenorrhea and breastfeeding. using NFHS4 data set STATA 15.1.

plz, help me how to calculate the mean/median number of months of postpartum amenorrhea and breastfeeding.

and how to take in Numerators: in DHS\_statistics\_DHS -7 (page number 5.30)

1) Number of births at specified times before the survey for which the mother is postpartum amenorrheic (i.e., her menstrual period has not resumed since the birth) (m6 = 96)

Thank you in advance,

Best,  
Akash H
