Hi,

I am trying to use R for DHS data analysis but struggle to weight data for advanced analysis, since this has to undertake complex sample analysis method. DHS have video for SAS, SPSS but not for R. May, I please request admin or anybody who could provide me solution to this step.

Thank you
Sajama

hello,
were you able to get some code for this;
if you were able, kindly share

Hi Dear,

You could find the R code in DHS Github. Look there.

I used R commander for this, (commander version), that doesn't need code.

Regards
Sajama

iam seemingly not getting help from where you have referred.
I am doing multilevel analysis i want to use R. trying to look for help on how to calculate level weights using R.
any help will be highly appreciated
thanks

Hi Jessy,

Please find the link for Github, where you would find the R code for all DHS chapters, which are same for all countries. If not, could ask DHS for help (most probably is same for all countries).
<https://github.com/DHSProgram/DHS-Indicators-R>

If this also doesn't work, let me know, if I have codes, will share with you (been long, so kinda lost). Good Luck

Regards
Sajama Nepali
